

COMPOSITIONS AND METHODS FOR TREATING RAGE-ASSOCIATED DISORDERS

ABSTRACT

5

Fusion proteins comprising a Receptor for Advanced Glycation End Products
Ligand Binding Element (RAGE-LBE) and an immunoglobulin element are
disclosed. Also disclosed are fusion proteins comprising a RAGE-LBE and a
dimerization domain. Also disclosed are nucleic acids encoding such fusion proteins
10 and methods for using disclosed nucleic acids and proteins to, for example, treat
RAGE-related disorders. Additional compositions and methods are also disclosed.
